1980 Article Index

Systems Management Principles

Organizational structures and data independence (Jan.)
Fernan A. Long

Effective data processing management (Apr.)
Successful computer systems represent the confluence of the total organization's objectives.
Charles F. Bimmerle and Leslie A. Densmore

Planning manpower in a downturn economy (May)
Poor planning for reduced manpower requirements creates extra losses of productivity and additional costs.
R. J. Schoysman

Office of the future: Is management ready? (June)
Author researches ASM members to test management's preparedness for the office of the future.
Margaret (Coleman) Morgan

Utility theory (July)
Authors describe what causes career advancement among managers and how to improve your mobility.
Dr. Edward Alexander Tomeski and Konrad E. Sadek

Toward system four through transactional analysis (July)
Article presents four systems for managing.
Dr. Heinz Weihrich and Dr. Andre'-Sean Rigny

Profitability in the nonprofit environment (Aug.)
Nonprofit organizations must seek substitutes for profit which can be measured, analyzed and encouraged.
Joseph E. Ryan

Management's assessment of computer information systems
Author probes managers for their evaluation and criticism of computer-based information systems they use.
James A. Senn

Applied mangement information (Sept.)
Author shows how basic management information was applied to solve a typical management problem.
Jim McGinnis

Motivated climate prevents white collar crime (Oct.)
Work climate survey uncovers discontent that fosters crime and sabotage.
Jack Bologna

Wage incentives: A valuable productivity tool (Oct.)
Wage incentives are an extension of work study programs and can increase productivity and reduce costs.
Dr. Vincent G. Reuter

Management Control Procedures (Dec.)
Michael J. Vogelpohl

Managing the Systems Effort

The decision graph in systems analysis (Jan.)
The decision graph separates between useless data and useful information.
Merle P. Martin

Evaluation techniques in project management (Feb.)
Non-evaluation procedures for functional employees are the main causes of project management failures.
Harold Kerzner

Business systems—2000 A.D. (Feb.)
Author prepares systems managers for the many changes that will come in the next two decades.
Ronald Bridges

Conflict management in the systems environment (Feb.)
Author explains the advantages of conflict management in systems management.
C. James Bacon

Making implementation a success or failure (Apr.)
Authors critically examine the factors resulting in the success or failure of systems' implementation efforts.
William B. Lee and Earle Steinberg

System life cycle model (Apr.)
Author summarizes the sequence of a system's life cycle.
Thomas P. Hall

Managing change (Apr.)
The Systems Manager is the leader of changes that if managed correctly will eliminate future changes.
Jagdish R. Dalal

Structured analysis (Apr.)
Author details the design of an integrated information system for a complex organization in the public sector.
Dr. Thomas E. Kirchgessner

The mysterious systems analyst (May)
Edward M. Canavan

Systems projects: process and product (May)
Systems managers must balance product against process in the design of a new system.
Belden Menkus

Information processing skills for future managers (May)
Survey among systems professionals shows the need for training in systems management approaches to business.
Dr. Barry Render and Dr. Ralph M. Stair

Streamlined look at work measurement (June)
Belden Menkus

Systems development for a fast payoff (July)
Anthony P. Llanos

Generating alternative solutions (July)
Author presents a systematic method of developing alternative solutions to problems.
Merle P. Martin

The organizational system (July)
Article shows managers and employees their organizations as integrated systems.
Miles H. Hudson

Coping with hindsight bias in a project (Aug.)
Authors describe the harmful nature of hindsight bias in a project's life cycle.
Dr. Lawrence A. Tomassini and Dr. Gary Grudnitski

Logical systems structure (Aug.)
Edward Baylin

Choosing between system development alternatives (Sept.)
Author defines strategies for solving the step-by-step decisions in the design of a system.
Phillip G. Elam

PEOPLE spells success . . . and failure (Sept.)
Shows areas of people problems and how to eliminate trouble.
Belden Menkus

Manual systems analysis as a professional discipline (Sept.)
Author examines the professional aspects of systems work.
F. W. Fleischhauer

How much planning in systems development? (Oct.)
Authors show techniques and tools of planning in the management of systems development.
Leonard L. Tripp and Dr. Pran N. Wahi

Don't forget the system (Nov.)
W. J. Boczany

Improvement of order processing work flow (Dec.)
A step-by-step case history of a systems project.
Robert I. Stevens

Selection and Training of Systems Personnel

Peer evaluation selects MIS professionals (Jan.)
Article describes how to reduce the risks in the recruitment, selection and retainment of MIS personnel.
H. Albert Napier

Human resources management: toy or tool? (May)
Author describes the advantages of a computerized human resources management system for personnel recordkeeping.
Vincent R. Ceriello

Information processing skills for future managers (May)
Survey among systems professionals shows the need for training in systems management approaches to business.
Dr. Barry Render and Dr. Ralph M. Stair

Job satisfaction and the systems professional (June)
Authors claim the job movement in the systems field is due to unfulfillment and propose remedies.
Dr. Edward Alexander Tomeski and Konrad E. Sadek

Selecting a project manager (Oct.)
William Atkins

Information Collection, Storage, Retrieval

Information gathering techniques (Jan.)
Author discusses the pros and cons of standard information gathering methods.
Thomas H. Athey

Forms redesign cuts bank's paperwork (Feb.)
Gary D. LeVan

Document flowcharts for internal control (Mar.)
Describes flowcharts can evaluate the adequacy of controls.
Dr. Max Laudeman

Simplifying company communications (June)
Author proposes a program to simplify written and verbal communications.
Gary A. Studer

The alpha sort—A set of filing rules (June)
Thomas D. Jones

Office communication and information (July)
Describes the benefits of improved office communications.
Belden Menkus

Policy and procedure language (Aug.)
Author shows how to automate procedures logically and eliminate diverse interpretations.
K. Venkata Rao

EDP user documentation: The missing link (Nov.)
DP's weakest link is often a missing link . . . user documentation.
Susan J. Grimm

Improvement of order processing work flow (Dec.)
A step-by-step case history of a systems project.
Robert I. Stevens

DP Hardware and Software Applications

Developing sophisticated computer applications (Jan.)
Automating higher levels of job optimizes the computer.
Dr. Michael J. Cerullo

Computer systems: more evolution than revolution (Feb.)
Author analyzes the probable mix between human and computer capabilities.
Victor A. Vyssotsky

The data junkies (Mar.)
Forest W. Horton, Jr.

Computer user's documentation (June)
Article provides a checklist for complete documentation of a systems project.
A. L. Darling

Planning performance in the EDP department (July)
Methods of organizing data needs and assigning priorities.
G. J. (Jack) Bologna

Minicomputers in city government (July)
Minis are a cost-saving method for municipal governments.
Mark Shapiro

Management's assessment of computer information systems
Author probes managers for their evaluation and criticism of computer-based information systems they use.
James A. Senn

Computer system development—who's responsible? (Sept.)
Richard Seib

Distributed data processing and micros (Sept.)
Including micros in the DDP plan avoids future accounting problems and network limitations.
John D. McGann

Forget the black boxes (Sept.)
The office of the future is more than technology, it is people.
Hank E. Koehn

Computer graphic applications (Nov.)
Author details the four basic areas of computer graphic applications and other display techniques.
Irvin M. Miller

The database approach (Nov.)
Author describes the steps in implementing a comprehensive database system.
Rory C. Robichaux

Software manufacturing (Nov.)
Jack E. Ewers

Managing computers in local government (Nov.)
Article describes ways to cost-effective computer systems and a local government environment.
Bruce G. Bradburn

User deliverable development in data base design (Dec.)
Article shows a methodology for reducing system development and still meet user needs.
Harvey M. Weiss

Management Sciences

Value added criterion for decision support system development
Cost displacement factors for expanding computer/decision systems are replaced with value added measurements.
William R. Greer, Jr.

Cost-benefit analysis for decision-making (May)
High costs of systems projects cause management to depend on planning aids to make cost-effective decisions.
John L. King

Generating alternative solutions (July)
Author presents a systematic method of developing alternative solutions to problems.
Merle P. Martin

The use of regression and correlation—Part 3 (Aug.)
Regression and correlation are statistical tools to gauge the health of a system.
Merle P. Martin

Choosing between system development alternatives (Sept.)
Author defines strategies for solving the step-by-step decisions in the design of a system.
Philip G. Elam

Management Information Systems

Peer evaluation selects MIS professionals (Jan.)
Article describes how to reduce the risks in the recruitment, selection and retainment of MIS personnel.
H. Albert Napier

Establishing a MIS (Jan.)
MIS often fall short of expectations because of unrealistic goals.
John C. Carter and Fred N. Silverman

Improved management of information systems development
Author shows how to measure actual time and costs involved in systems development.
Dr. Earl Chrysler

Evaluate your information system (Mar.)
A detailed procedure for checking a large information system.
Seev Neumann and Eli Segev

• User Guides • Procedures Manuals • Contingency Plans • Standards

Want Effective Documentation?

MARLUM user-suited documentation can be effective for general administration, manufacturing, financial, systems and data processing organizations by:

- **Facilitating user system development**
- **Increasing user and programmer productivity**
- **Reducing input preparation time**
- **Simplifying documentation updating**

For a copy of our brochure, write us on your company letterhead.

Continued from page 42

Management Information Systems

Structured analysis (Apr.)
Author details the design of an integrated information system for a complex organization in the public sector.
Dr. Thomas E. Kirchgessner

Relational data bases (June)
Author cuts through some of the mystery surrounding relational data bases.
Myles E. Walsh

Identifying the need for a DBMS (Aug.)
Niv Ahituv and Michael Hadass

Is communication a two-way street? (Aug.)
Richard R. Riker

DDP in the corporate business plan (Sept.)
Article shows how systems professionals integrate the needs of users, planners, and managers into an operable system.
Fred H. Lambrou

Information systems success factors (Dec.)
Author surveyed Fortune 1000 firms for successful techniques in their MIS.
Michael J. Cerullo

Graphic Presentations and Reports

Development of a structure of reports (Jan.)
Author sets guidelines for organizing and evaluating the reports of any company.
Robert G. Murdick

Preparing and using administrative manuals—Part 1 (Mar.)
A. James Andrews

Preparing and using administrative manuals—Part 2 (Apr.)
A. James Andrews

Coding manual for users (May)
A. L. Darling

Preparing and using administrative manuals—Part 3 (May)
A. James Andrews

Instant analyst—Chartmanship (June)
Series on technique to becoming an instant analyst.
Merle P. Martin

Policy and procedure language (Aug.)
Author shows how to automate procedures logically and eliminate diverse interpretations.
K. Venkata Rao

Improving systems presentations (Oct.)
Article presents guidelines to upgrading oral presentations to critical audiences.
Col. Len Lee

Computer graphic applications (Nov.)
Author details the four basic areas of computer graphic applications and other display techniques.
Irvin M. Miller

Case Histories

Determining cost effectiveness of automatic typewriters (Feb.)
Article presents a method for measuring cost effectiveness of automatic versus standard typewriters.
Rich Savitsky

Human resources management: toy or tool? (May)
Author describes the advantages of a computerized human resources management system for personnel recordkeeping.
Vincent R. Ceriello

Minicomputers in city government (July)
Minis are a cost-saving method for municipal governments.
Mark Shapiro

Systems development for a fast payoff (July)
Anthony P. Llanos

Profitability in the nonprofit environment (Aug.)
Nonprofit organizations must seek substitutes for profit which can be measured, analyzed and encouraged.
Joseph E. Ryan

Managing computers in local government (Nov.)
Article describes ways to cost-effective computer systems in a local government environment.
Bruce G. Bradburn

DP in the health care organization (Dec.)
Article describes optimum placement of the DP department in a health care organization.
Dr. Ik-whan Kwon and Dr. Thomas K. Vogler
